Hazardous Weather

Day 1 Weather Hazards

Valid: 0800 Sun - 0800 Mon

Isolated areas of heavy rain and flash flooding possible over NM, especially over burn scar locations

A few strong storms possible this afternoon and evening; gusty winds are the main threat

Showers and storms continue; a few may produce heavy rainfall but any flash flooding would be isolated

- Very Common – Happens Often
- Common – Happens Frequently
- Uncommon – A Few Times a Year
- Rare – Once Every 1-5 Years
- Very Rare – Once Every 5-10 Years

*Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.

Hazardous Weather

Day 2-3 Weather Hazards

Valid: 0800 Mon - 0800 Wed

Isolated areas
of heavy rain
and flash
flooding
possible over
NM, especially
over burn scar
locations

Scattered showers and storms
over much of the Region
expected each day, but threat
for organized severe weather or
flooding is low

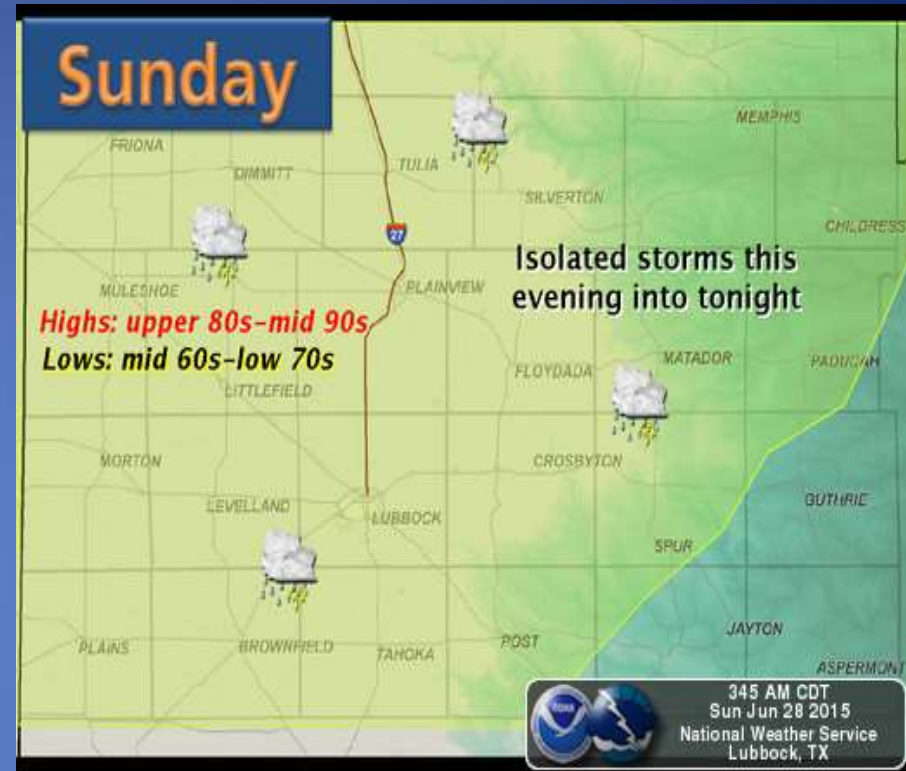

-  Very Common – Happens Often
-  Common – Happens Frequently
-  Uncommon – A Few Times a Year
-  Rare – Once Every 1-5 Years
-  Very Rare – Once Every 5-10 Years

*Threat levels are based on FEMA
Region 6 criteria. State or local
threat level criteria may differ.

Hazardous Weather

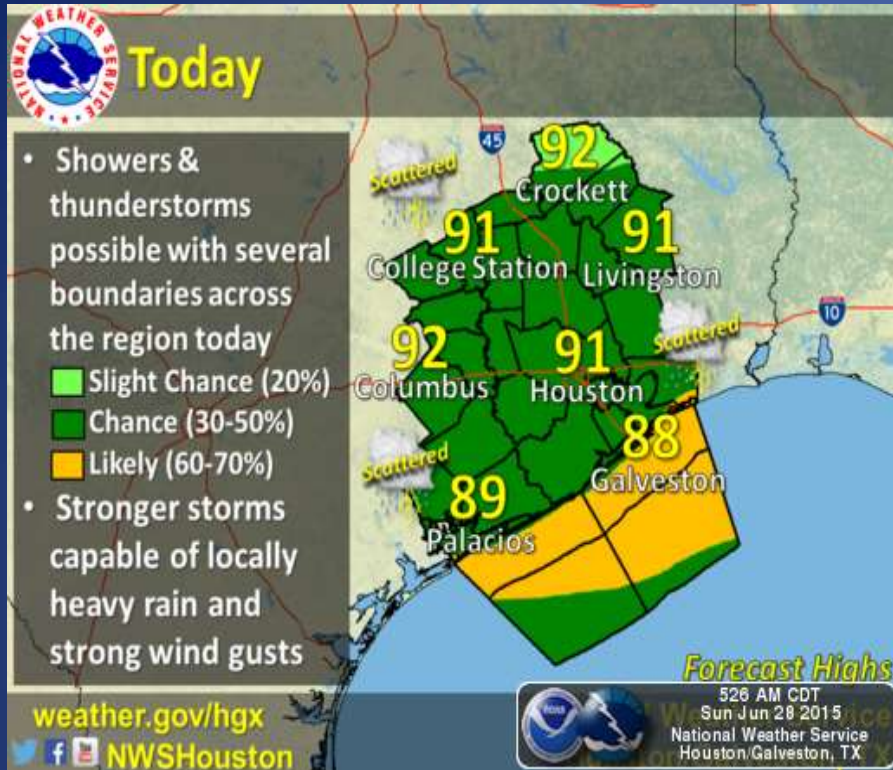

Highs will climb into the 90s across the area (upper 80s in higher elevations) under partly sunny skies today. There may be a few isolated storms this afternoon that could produce gusty wind and brief heavy rain, mainly across the Davis Mountains and Marfa Plateau, as well as in portions of the Rio Grande Valley.

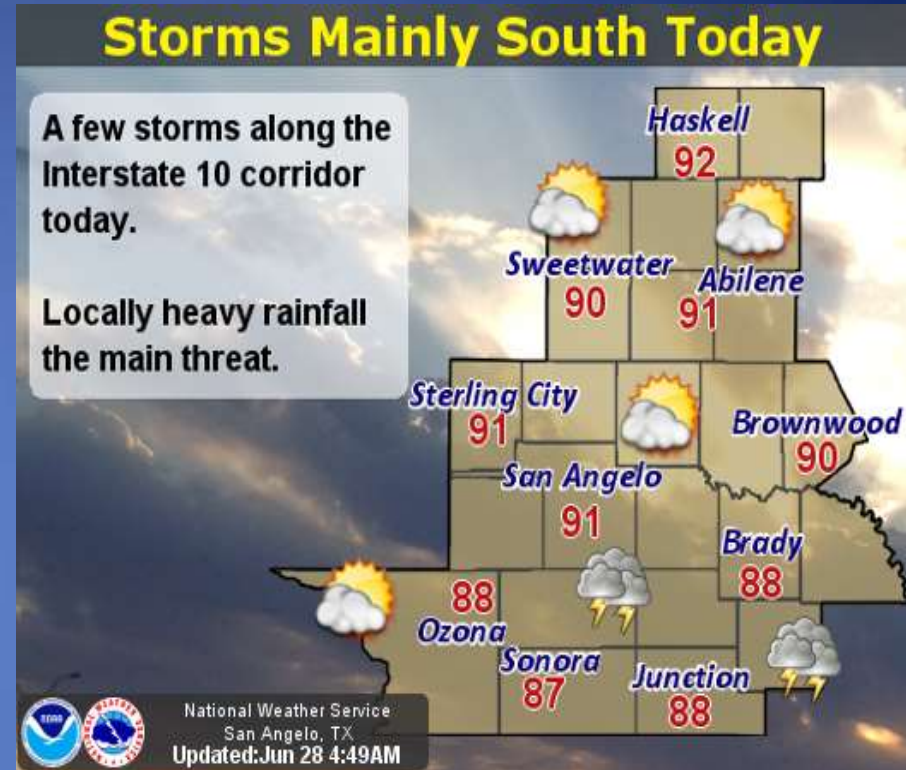

After a seasonably warm Sunday afternoon, isolated showers and storms will be possible this evening into tonight as an upper level jet noses into the region out of the Texas Panhandle. Downburst wind gusts to 50 mph will be possible with the strongest storms.

Hazardous Weather

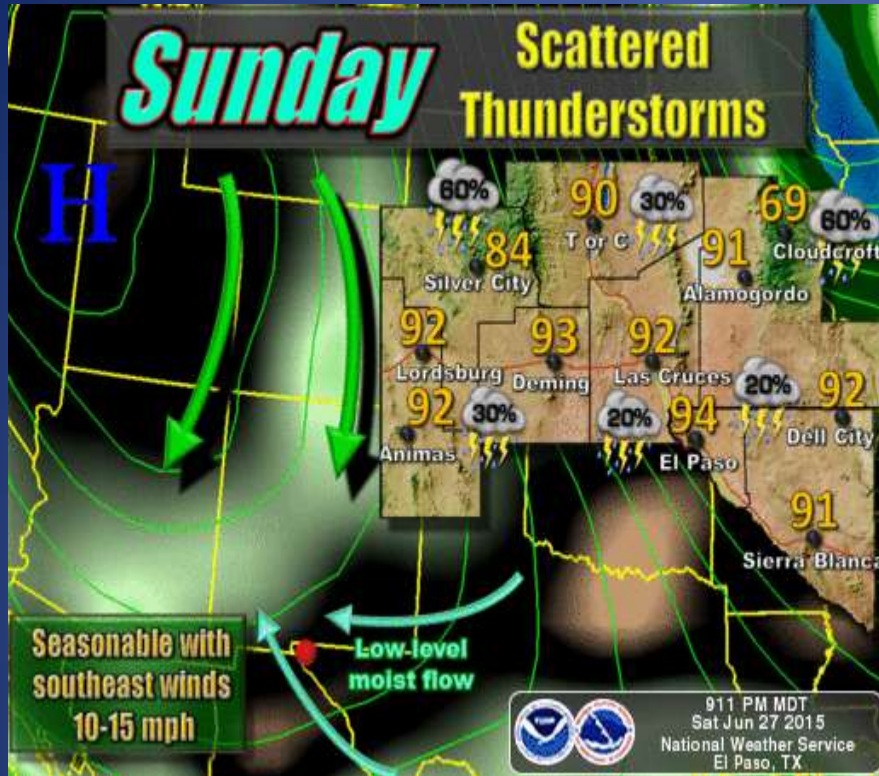

Scattered thunderstorms possible across the region today, with some capable of locally heavy rainfall.

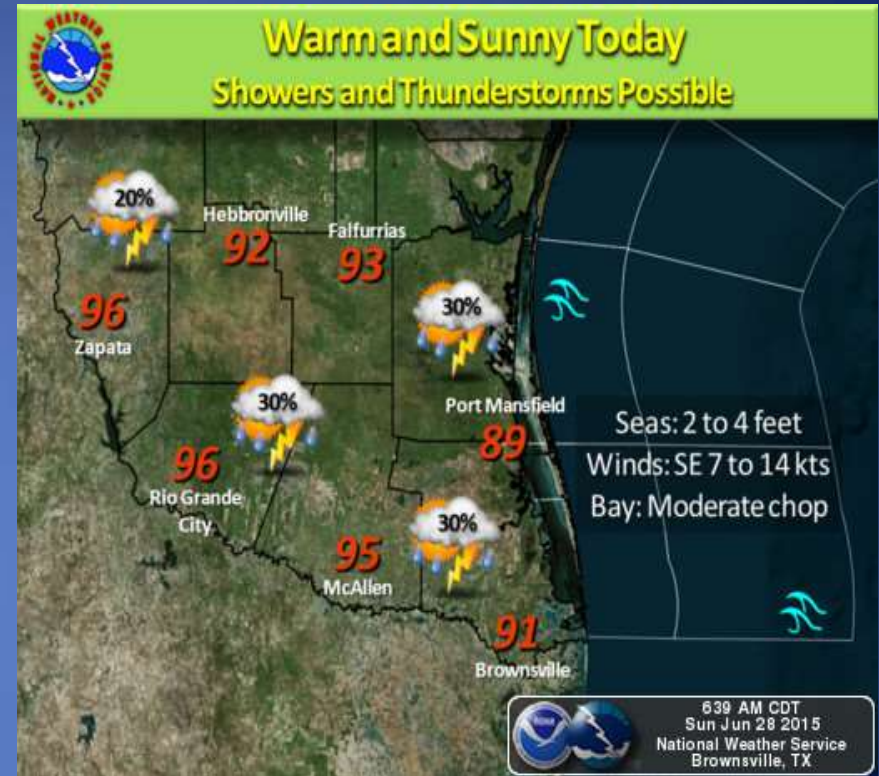

A few storms will be possible mainly south of an Ozona to San Saba line. Severe weather is not expected, but localized heavy rainfall will be possible. The rest of the area will see highs around 90 under partly cloudy skies.

Hazardous Weather

Fairly static pattern setting up, not only for Sunday, but likely into the mid portion of the new week. Upper high pressure will remain anchored over Nevada/Utah, while low level southeast flow will persist. This means our airmass will continue to be moderately moist and unstable, leading to scattered showers and thunderstorms-- likely forming over the mountains early afternoon and then spreading to the lowlands late afternoon and evening.

Temperatures this afternoon will be warm in the lower to middle 90s with a chance of showers and thunderstorms. Most of the activity will be along and east of Highway 281. If you head to the beach, be sure to put on sun block with the UV Index being Extreme.

Hazardous Weather

Isolated to scattered showers and thunderstorms will be possible again today across South Texas. Warm conditions will continue with highs in the upper 80s to middle 90s.

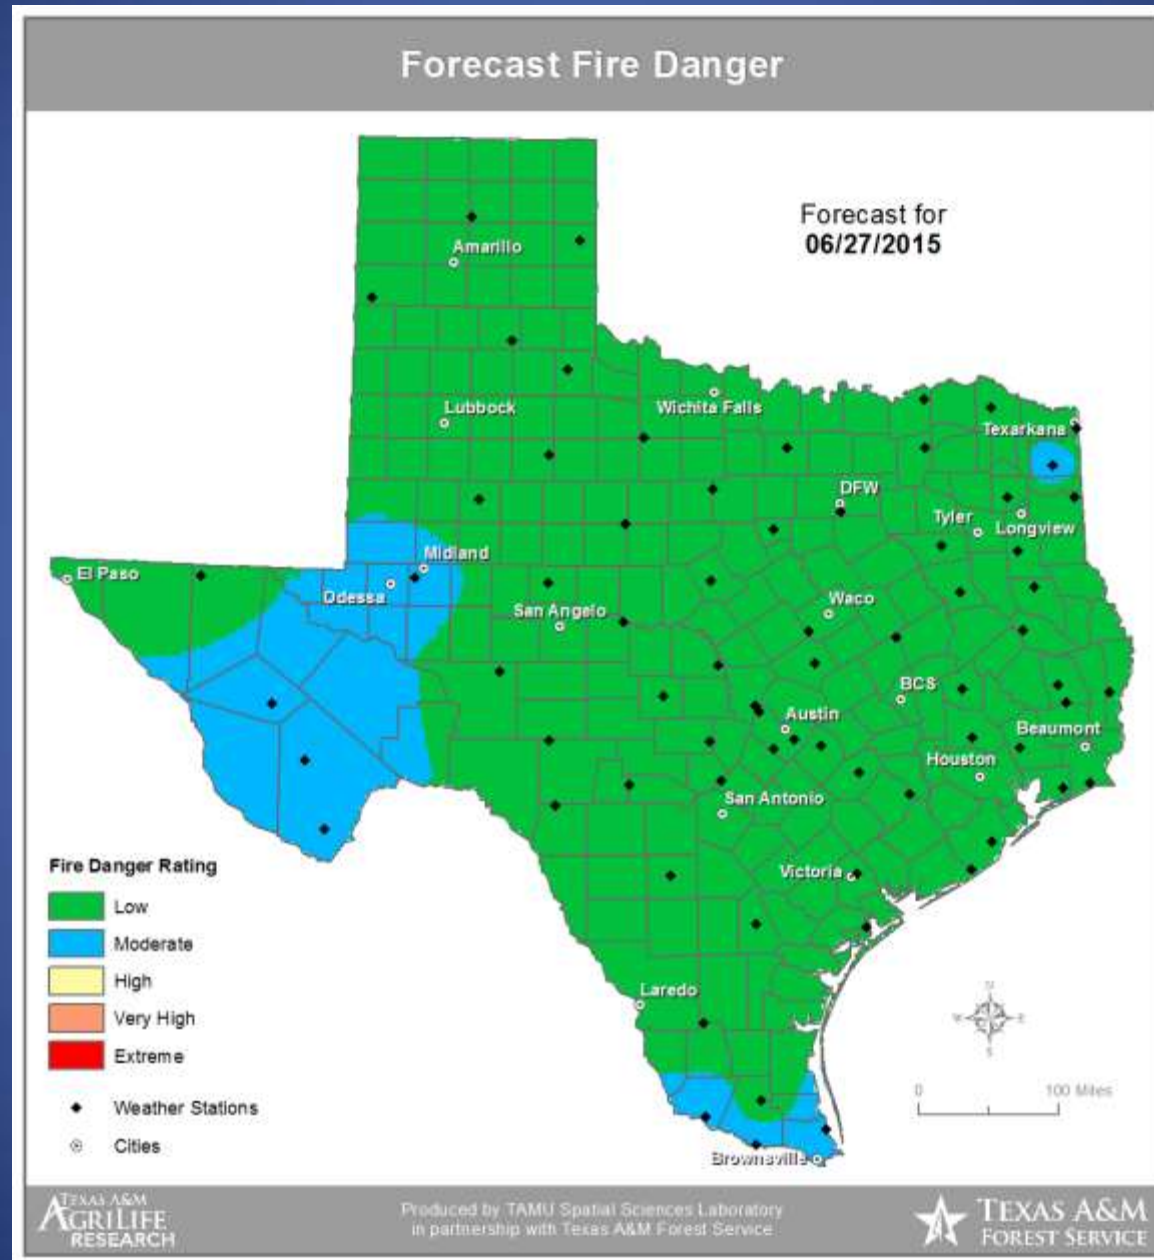

Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
06/27/15	Significant Weather Advisory	Atascosa, Bandera, Blanco, Comal, Dimmit, El Paso, Fayette, Frio, Kendall, Kerr, Kinney, Lavaca, Maverick, McLennan, Real, Starr, Tom Green, Travis, Uvalde, Wilson and Zavala Counties
